WALL ART

Fine Art

We offer three different fine art surfaces - Fine Art paper, E-Satin paper, and Fine Art Canvas. All types are available in color, sepia, or black and white. Corel Painter or Photoshop work is not included in pricing. It is available for \$75 per hour.

Fine Art paper is an acid-free, 100% cotton rag paper with a bright white matte textured surface. E-Satin paper answers photographer's request for a heavier, more substantial photo paper with excellent ink retention. This paper maintains a traditional E-Surface finish. Fine Art canvas employs a direct-ink application to give texture to your print. Masonite or stretcher frame options are available. We offer acrylic clear laminate, or acrylic matte laminate to protect against fingerprints, scartches, and UV damage.

Gallery Wraps

Gallery Wraps are a beautiful way to show off your images with a high end product. They look great hanging individually or as a grouping. They are inkjet-printed to fine art canvas and then wrapped completely around a 1.5" wooden stretcher frame and stapled. Staples are hidden from sight, leaving your image as 100% of the viewing surface. Initial print must be oversized to allow for wrapping the print around the stretcher frame. For protection and fade resistance, we add your choice of acrylic clear or matte laminate to the canvas before stretching. Your end product will come with a fully finished backing with a sawtooth hanger and wall bumpers.

Soft Wraps

The Soft Wrap is a unique option in displaying images, designed for meeting the needs of those that wish to exhibit images without frames or for those occasions where the décor needs to be more minimalist. The perfect alternative to gallery wraps and shadow mounts, they make beautiful wall displays individually or in a grouping. Soft Wraps are created by wrapping the photographic print around padding, which creates the soft dimensional look of the print. This is wrapped around Masonite to maintain structural integrity. The print or canvas is protected with your choice of clear or matte laminate. You may add an optional pre-drilled wood frame mounted on the rear and ready for hanging “off the wall” in line with many modern decorating tastes.

Since all Soft Wraps come with black finished art board backing, it is possible to order your Soft Wrap without the wood frame mount. For instance, you may prefer to display your Soft Wrap on an easel rather than hanging it on a wall.

Shadow Mounts

Our Shadow Mounts are a unique and trendy method for displaying your prized prints. We mount your print on rigid black polystyrene, and then we mount this to a black 1.5” hardwood frame for a beautiful flush mount. The frame comes ready for hanging. The shadow mount adds a great contemporary look to any home. They make a great alternative to a gallery wrap when the crop of your image does not allow for wrapping.

Natural Wood Inlay

The Natural Wood Inlay adds a great natural and organic look to any home. The print is mounted on polystyrene and then the print is mounted to a natural wood 1.5' frame for a beautiful inlay. Each Natural Wood Inlay comes ready to hang.

Natural Wood Prints

METAL

Metal Print

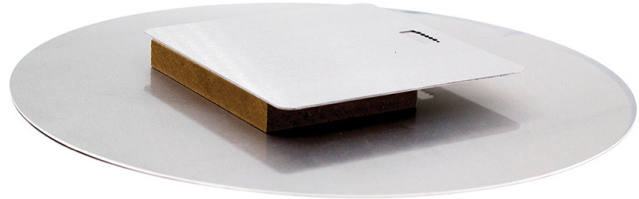

Designer Metal

Metal Prints

Metal prints are the perfect way to bring out the vibrant colors in your photos! Our metal has a white base, so all colors in your image will be vivid and bright. It also has a high gloss surface, allowing the print to reflect light for a glossy appearance. All metal prints have rounded corners. A wall mount may be added, which is a pre-drilled wood frame mounted on the rear, allowing the print to hang “off the wall.”

These prints are printed on aluminum that has a coating applied with state-of-the-art coating machines. The coating that is applied sometimes contains small imperfections such as small craters or bumps. We inspect each sheet carefully, and, if there are imperfections, we place them in the most unobtrusive parts of the image. We cannot remake metal prints due to these imperfections unless they are located in a very prominent part of the image. Metal prints are weatherproof and moisture-proof, but they will fade like a photograph, so please avoid direct sunlight.

Circle Metal Prints

These round metal prints have a white base, so all colors in your image will be vivid and bright. They are available in four sizes. If desired, you may add a wall mount.

Designer Image Panels

Our image panels are a modern alternative to a traditional framed photo that will make those senior images pop! They are 1/8" thick and have a smooth, finished black edge and a back with an easel for display. Our dye sublimation process provides exceptionally vibrant colors and makes the image panel UV and scratch resistant. We offer four shapes - Benelux (pictured), Berlin, Pamplona, and Prague.

Image Panels

1/4" thick, durable hardboard with rounded corners. UV resistant coating - beautiful color reproduction and fantastic image clarity. Ready to display. Great for gifts and keepsakes! Available in easel-backed and hinged options.

Natural Mount

The Natural Wood Inlay adds a great natural and organic look to any home. The print is mounted on styrene and then the print is mounted to a natural wood 1.5' frame for a beautiful inlay. Each Natural Wood Inlay comes ready to hang.

Soft Wraps

The Soft Wrap is a unique option in displaying images, designed for meeting the needs of those that wish to exhibit images without frames or for those occasions where the décor needs to be more minimalist. The perfect alternative to gallery wraps and shadow mounts, they make beautiful wall displays individually or in a grouping. You may add an optional pre-drilled wood frame mounted on the rear and ready for hanging “off the wall” in line with many modern decorating tastes.

Since all Soft Wraps come with black finished art board backing, it is possible to order your Soft Wrap without the wood frame mount. For instance, you may prefer to display your Soft Wrap on an easel rather than hanging it on a wall.

Metal Prints

Metal prints are the perfect way to bring out the vibrant colors in your photos! Our metal has a white base, so all colors in your image will be vivid and bright. It also has a high gloss surface, allowing the print to reflect light for a glossy appearance. All metal prints have rounded corners. A wall mount may be added, which is a pre-drilled wood frame mounted on the rear, allowing the print to hang “off the wall.”

Birch Wood

Birch Wood Prints are printed directly onto 1/2 inch Baltic Birch boards, the natural tones and grain of the wood combine with your image to create a warm piece of art. No two prints are precisely alike, as each piece of wood has it's own characteristics. Giving you a unique piece every time.
